

The March Edition of Kennedy Tank Talk

Team,

Thank you for reading the March edition of Kennedy Tank Talk. Please see below to learn about exciting updates from the Kennedy Tank Team.

New Field Fabrication Building is now complete!

Kennedy Tank Field Services' new shop is complete and ready to serve our customers' needs! Force Construction broke ground in mid-November and after four short months is ready for service! This state-of-the-art 5,000-square-foot shop brings much-needed improvements and will serve as a dedicated space for expedited repairs and fabrication to meet and exceed our customers' needs.

We have immediate availability for pressure vessel repairs, heat-exchanger repairs and retubes, tank repairs and modifications, and mechanical piping fabrication. With dual 10-ton overhead cranes, no project will be too large for our Field Services shop to handle.

Utilizing our shop for off-site repairs can create a highly efficient turn-around process and expedited project completions to get you back in production.

Please take time to view the photos below showing progress throughout the past four months and let us know how we can be of assistance to your plant.

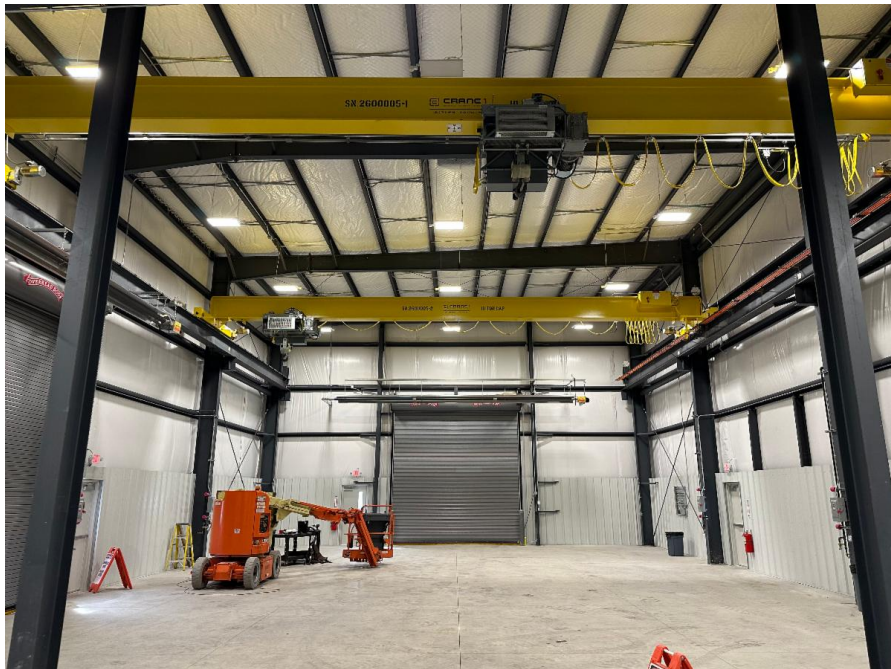

This photo was taken days after the team broke ground in the middle of November.

Safety was absolutely top priority for the duration of this project. Communication was also key to the success of this project.

(2) 10 ton cranes installed and ready to be put to work

Industrial racking which will help with dry storage

Thanks to everyone who helped make this project a huge success!!

Please reach out to any of your Kennedy Tank representatives if we can be of assistance in utilizing this new resource.

Sincerely,

Dave Reinkemeyer: Dreinkemeyer@kennedytank.com, 317-780-3576
