

The July Edition of Kennedy Tank Talk

Team,

Thank you for reading the July edition of Kennedy Tank Talk. Please see below to learn about exciting updates from the Kennedy Tank Team.

(2) 36,000 SS API 650 tanks delivered!

The Kennedy Tank team engineered, built, and delivered (2) 36,000 API 650 tanks which were 14' OD X 32' shell height with a flat bottom and cone roof to a new customer in Kentucky.

These tanks were delivered on time and our customer was 100% satisfied with our performance while visiting our shop during fabrication and once these were delivered to their facility. A great job by the entire Kennedy Tank Team!

Several Interesting Projects in Fabrication

We are mid-fabrication on (2) 14'-6" diameter X 34' long carbon steel water filtration tanks fitted with several internal and external stiffeners.

We also built this BEM 23-240 shell and tube heat exchanger that was comprised of 2205 duplex material for both the tubes and tube sheets.

These are being built in bay 5 which is our largest bay.

We have both thermal and mechanical engineering expertise for heat exchangers.

Heavy Wall PWHT Vessel Hits the Road

Kudos to the entire team who engineered, fabricated, tested, and painted this 90,000-pound bullet vessel. This vessel was post-weld heat treated, fully x-rayed twice, had fireproof painted saddles, and much more.

Kennedy Tank Trivia!

Whoever guesses the closest tangent to tangent length of this distillation column wins a Kennedy Tank Prize Pack.

We built this unit for an ethanol plant located in the midwest and it is currently in service and performing well!

Email Jkennedy@kennedytank.com or comment on LinkedIn to be in the running to win this valuable prize pack!

Technology Improvements

Last week, thanks to **Craig Killebrew** and **Paul Bolin** we updated our phone system throughout both our manufacturing and field division which has already improved our internal and external communication.

This new system has many new features you will see when calling or participating in a conference call with Kennedy Tank. We are committed to consistently improving our technology so we can keep moving forward to make Kennedy Tank a leader in the vessel and tank industry.

Please reach out to any of your Kennedy Tank representatives if we can be of assistance on pressure vessels, tanks, heat exchangers, field-erected tanks, and much more.

Sincerely,

Dave Reinkemeyer: Dreinkemeyer@kennedytank.com, 317-780-3576
