

The April Edition of Kennedy Tank Talk

Team,

Thank you for reading the April edition of Kennedy Tank Talk. The Kennedy Tank Team has provided updates below.

New Manufacturing Building Making Progress

Our new manufacturing building expansion is rocking and rolling, and we plan to start fabricating large-diameter vessels and tanks this summer.

This will add roughly 15,000 square feet of capacity with new state-of-the-art equipment, improving our safety, quality, and efficiency.

This will also drastically improve our lead times on larger vessels, tanks, and exchangers.

We are thrilled to announce that **Lisa Young** has been promoted to Sales Administration and Scheduling Assistant at Kennedy Tank.

Lisa started at Kennedy Tank as a receptionist, where she quickly learned the role and helped out in other areas as well. She has picked up her new role quickly, and we are lucky to have her on our team!

This exchanger was delivered within 10 weeks of the purchase order due to the Kennedy Tank Team expediting materials and working with our quality control and authorized inspector to meet and exceed all ASME requirements.

80,000 pound vessel hits the road!

This week we shipped this heavy-wall carbon steel pressure vessel that is 12' -0" I.D. X 56' -0" tangent to tangent length, 2:1 elliptical heads on support saddles and weighing 80,000 pounds.

This vessel weighs 80,000 pounds and is going to a chemical manufacturing plant that offers products for creating resins, synthetic rubber, fragrances, insecticides, lubricants, oils, coatings, fertilizers, and other chemical compounds.

Derick Muse CWI

We would all like to congratulate **Derick Muse** for passing his certified welding inspector (CWI) exam this month.

Derick has recently joined our quality control team and has hit the ground running and already helping to improve the quality in our manufacturing facility.

He spent several years as one of the best welders on pressure vessels and heat exchangers at Kennedy Tank.

He is now the seventh CWI we have working at Kennedy Tank!

Great work Derick.

Field Erected Tank Capabilities

In the photo below, our team of field boilermakers is welding out floors for a multi-field erected tank project in the Midwest. We can field erect tanks up to 150'-0" in diameter and would love to work with you on your next field-erected tank need.

Please reach out to any of your Kennedy Tank representatives if we can be of assistance on pressure vessels, tanks, heat exchangers, field-erected tanks, plant maintenance, and much more.

Sincerely,

Jim Kennedy: jkennedy@kennedytank.com, 317-780-3523

Tim Noyes: Tnoyes@kennedytank.com, 317-780-3526
