The May Edition of Kennedy Tank Talk

Team,

Thank you for reading the May edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

The Month of May in Indy

May is Indianapolis's best month due to the greatest spectacle in racing. The Indy 500 will take place on May 26th, and nearly 400,000 people will gather for the greatest spectacle in racing.

The Kennedy Tank Special competed in the 1948 and 1949 Indianapolis 500, and Pat Kennedy used to drive it at speeds in excess of 120 miles per hour around the track every May.

Updates from Kennedy Tank

Thank you to all of our Kennedy Tank teammates who volunteered for trash pick up a few Fridays ago which brought some friendly competition between teammates over our 20 acres.

Our field division continues to make progress on a multi-field erected tank project located in the Midwest. We have nearly two tanks complete and have several more to erect.

New 10,000 Square Foot Manufacturing Building

We are weeks away from fabricating in our new manufacturing building which will allow us increased capacity for large diameter shop built vessels and tanks as well as columns and large alloy shell and tube exchangers.

Monthly Safety Trainin

Melanie Komasinski effectively led our monthly manufacturing safety meeting this week where she focused on the team inspecting their personal harnesses and discussed several other topics, including recording near misses, fall protection, and PPE.

Steel Tank Institute Pressure Vessel of the Year!

We could not be more proud of the entire Kennedy Tank Team, who won the 2023 STI Pressure Vessel of the Year award at the annual [STI/SPFA](#) conference!

We fabricated (3) 22,500-gallon vertical air receivers that Kennedy Tank built to store compressed air for the Las Vegas Sphere.

Bill Kennedy, Melanie Komasinski, and Dan Yoder accepted this award on the team's behalf at the Arizona STI/SPFA annual conference.

Please reach out to any of your Kennedy Tank representatives if we can be of assistance on pressure vessels, tanks, heat exchangers, field-erected tanks, plant maintenance, and much more.

Sincerely,
The Kennedy Tank Team
