The August Edition of Kennedy Tank Talk

Team,

Thank you for reading the August edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

New Manufacturing Expansion Ready!

Boots remain on the ground as our new Lincoln sub-arc is now working properly in our new 12,000 square foot manufacturing building. Many thanks to the Lincoln team for training our group of craftsmen on this new technology, which will drastically improve safety, quality, and efficiency as we continue to expand.

20,000 Gallon API 650 Tanks

The team recently completed fabricating and lining/painting (4) spent caustic tanks that were 12' ID X 20' tall, with a flat bottom and cone roof made of A36 carbon steel, for a refinery in the Midwest in which three of them are shown below.

We had several customer visits and were able to build these with top quality through the duration of this exciting project.

As shown below, we are thankful for our quality control team, minus Mark Roe, who was busy in receiving at the

Yesterday, we had another successful customer inspection on a small carbon steel vessel rated for +1480

time of this photo. You are looking at over 90 years of experience here at Kennedy Tank.

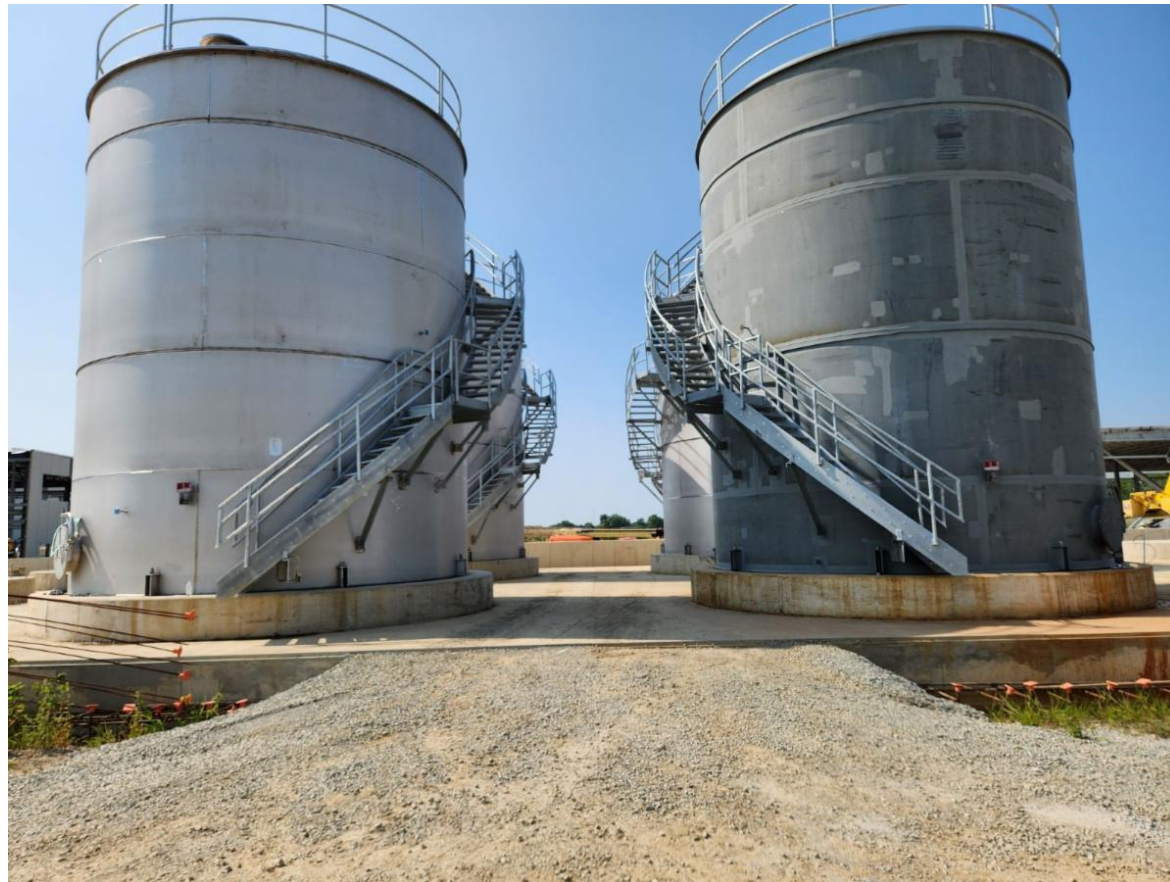

We have (3) Certified Welding Inspectors, Radiographic Inspectors, and a NACE Level 2 inspector, all shown below.

PSIG and full x-ray.

This is the third time we have built this small vessel, and we love it when both customers and inspectors visit our facility to inspect our equipment. Last month, we had over 25 customers and inspectors visit our facility.

Leaders in Field Erected Tank Projects

The team just completed a field erected tank job in the Midwest which consisted of (5) field erected API 650 tanks. Our customer could not be more delighted with our efforts on this project!

Please reach out to any of your Kennedy Tank representatives if we can be of assistance on pressure vessels, tanks, heat exchangers, field-erected tanks, plant maintenance, and much more.

Sincerely,
The Kennedy Tank Team
